She'll be negative earth John so you will have a positive feed from the battery down to the large connection stud on the starter. Do all the starter connections first, then fit the positive battery lead, then the neg side. Save's any embarrassment, welding of spanners or the last old chestnut. machine trundling around the paddock with you on the loader arms Mark

wiring JCB 3c M11 starter Motor - The Classic Machinery ...

The yellow color of special equipment was first used by Caterpillar - a brand with a long history of special equipment production. JCB cars were originally painted blue and red. But the decision to change the color was made, first of all, because the yellow color on the construction site draws attention to itself, which means it calls for attention.
