Ageing Populations in Post-industrial Democracies ...

The new demography of low fertility and, to an even greater extent, low mortality produces population ageing. Figure 3 summarises the change in age structure of the German population in the half century up to 2006 and the next half century. 33 Because of Germany's losses in the two World Wars, the panel for 1956 is jagged. About one person ...

Ageing populations: the challenges ahead

During the first Industrial Revolution, Britain experienced massive changes including scientific discoveries, expanding gross national product, new technologies, and architectural innovation. At the same time, the population changed—it increased and became more urbanized, healthy, and educated. This nation was forever transformed for the better.

Population ageing is an increasing median age in a population due to declining fertility rates and rising life expectancy. Most countries have rising life expectancy and an ageing population (trends that emerged first in developed countries, but which are now seen in virtually all developing countries). This is the case for every country in the world except the 18 countries designated as ...

Ageing report - United Nations

In sociology, the post-industrial society is the stage of society's development when the service sector generates more wealth than the manufacturing sector of the economy.. The term was originated by Alain Touraine and is closely related to similar sociological theoretical concepts such as post-Fordism, information society, knowledge economy, post-industrial economy, liquid modernity, and ...

Post-industrial society - Wikipedia

Population ageing is a blessing, not a curse All EU countries are experiencing accelerated population ageing. According to the European Commission's demographic projections, the European Union's population is expected to peak at 526 million people in 2050. By then, nearly 30 percent of the total population will be over 65.
