AP Biology: Chapters 18 Flashcards | Quizlet

18.1: Flow chart. Phage attaches to host cell and injects DNA. Phage DNA forms circle. Certain factors determine which cycle is entered. New phage DNA and proteins are synthesized and self-assemble into phages. Bacterium lyses, releasing phages. Phage DNA integrates into bacterial chromosome. Bacterium reproduces, passing prophage to daughter cells.

Be aware: Printing out lectures notes does not mean that you can skip class or sleep through lectures! In fact, the notes that I provide you are meant to help you to maximize learning in the classroom. A successful student should print out the notes and practice active listening skills as I discuss each slide. Ask questions! Jot down additional information.
