Basic Life Support (BLS) The AHA's BLS course trains participants to promptly recognize several life-threatening emergencies, give high-quality chest compressions, deliver appropriate ventilations and provide early use of an AED. Reflects science and education from the American Heart Association Guidelines Update for CPR and Emergency Cardiovascular Care (ECC).

### **Basic Life Support (BLS) | American Heart Association CPR ...**

Good Samaritan laws may differ for professional health care providers from state to state. Implied consent means that there is an assumption that if an unconscious person were able to request care, they would do so. Fear of Uncertainty: People sometimes fear that they won't remember what to do. Remembering the correct number of compressions or the number of compressions to ventilations is not as important as the willingness to respond and to push hard and fast.
