Unlike most other countries, China's Great Firewall means that engines like Google and Bing are rarely used. Instead, China has a few main companies that seem to dominate this market, and one key search engine, Baidu. While there are plenty of search engines in China, Baidu leads the race for dominance by far.

Without disassembling my engine I believe mine to be a Zongshen with 71mmx58mm bore and stroke that equals 229cc. What concerns me is that the chinese are good at copying things and there appears to be no real way to identify these engines as some don't even have any engine model number and just a serial number.
