If the code we are testing is asynchronous then we need to take this into account when writing our tests. There are three mechanisms we can use. The Jasmine done function and spy callbacks. We attach specific callbacks to spies so we know when promises are resolves, we add our test code to those c...

Testing Asynchronous Code - Angular - CodeCraft
Know how to Unit Test Angular using Jasmine, Karma and the Angular Test Bed IMPORTANT: This courses teaches you Angular v 2 4+ from scratch, you don't need to know AngularJS 1.x. The first chapter in the course is a quickstart where you dive straight into writing your first Angular application.

Angular 4: From Theory To Practice | codecraft
A distinction between Object and Map is that Maps record the order in which elements are inserted.It then replays that order when looping over keys, values or entries.

Map & Set - Angular 2: From Theory To Practice - CodeCraft
The Angular CLI at the time of writing (09/2016) is still in a prototype stage and has a number of issues that still need to be addressed. The biggest is that it doesn't currently work with the Angular router.
