Take a look at the steps we'll take to protect your data, your customers, your business, and your brand: We Identify and Assess the Threat

Incident Response - Computer Forensics Resources ...

Through incident response combined with a deep forensic analysis, the number of security issues and computer attacks can be reduced and detected at an early stage. This should be a mandatory role for all the digital ecosystems that can be audited, such as Cloud Infrastructures, mobile devices, operating systems, and so on.

Incident Response and Forensics - InfoSec Resources

Computer forensics, the newest branch of computer security, focuses on the aftermath of a computer security incident. The goal of computer forensics is to conduct a structured investigation to determine exactly what happened, who was responsible, and to perform the investigation in such a way that the results are useful in a criminal proceeding.

analyze artifacts essential to incident response, information security, and media exploitation.

GIAC Certifications: Incident Response And Forensics

The difference in the goals of incident response and forensic analysis is perhaps the most important. Incident response is focused on determining a quick (i.e., near real time) reaction to an immediate threat or issue. For example, a house is on fire and the firemen that show up to put that fire out are involved in incident response.

Incident Response Versus Forensic Analysis | Ziften ...

With the increasing number of computer security and digital evidence related incidents and their associated losses, CFS believes our Forensic Analysis Services are key to our customers' incident response capabilities.
