Software Defined Radio - An Introduction

Enter data in a blank column (or field), Access assigns a data type to the field based on the values that you enter or you can assign the data type and format for the field. On the Modify Fields tab, in the Fields & Columns group, click Add Fields , Access displays a list of data types that you can select from.

Introduction to data types and field properties - Access

Software-defined radio is a concept according to which RF communication is achieved by using software (or firmware) to perform signal-processing tasks that are typically performed by hardware. A software-defined radio (as in, the device itself) is an RF communication system that incorporates a significant amount of this software-based signal ...
