Ford Ranger (2006) - fuse box diagram - Auto Genius

You only need relays when the switch itself can't handle the load. (A relay is just a switch powered by a smaller current). Modern vehicles tend to use small micro switches that can't handle any current so they require a relay. If you use an old school toggle switch they are generally rated at something like 30+ amps so a relay is redundant.

Switch to Relays - Ford Ranger Forum

The 2003 Ford Ranger came with a variety of engine configurations and trim levels, but all model variations of that year's Ranger have a fuel pump safety switch designed to shut off the fuel pump in the event of an accident. If your vehicle's fuel pump appears to be disabled after a hard jolt while driving, ...
