GE Frame 5 Service Manual, Page: 6 - User manuals GE's DLN family (DLN 2/2.6/2.6+/2.6e) of combustion systems enables GE's F- and H-Class gas turbines to reduce NOx emissions while enabling high plant efficiency plus extending outage intervals. The DLN 2.6e maintains many of the elements of GE's DLN 2.6+ combustion system but introduces advanced premixing to the 7HA turbine combustor.

7HA Gas Turbine | GE Power Later, as GT Chief Engineer, Bob developed the rotor maintenance factor methodology which he again included in GER3620. For GE, the Maintenance Factor approach became a key tool for the Service organizations in its O&M aftermarket business operations as well as with new unit sales proposals.

2017 User Conference - Frame 6 Users Group

For R1 and R2 rotor blades showing signs of tip distress, Advanced Turbine Support recommends, at a minimum, a visible dye-penetrant inspection to determine if radial cracks have initiated (Fig 10). For R3 blades, the company recommends a minimum of a 360-deg roll with a close-up inspection of all blade tips at the same intervals.
