Hoya is a genus of 200–300 species of tropical plants in the dogbane family, Apocynaceae. Most are native to several countries of Asia such as Philippines, India, Thailand, Malaysia, Vietnam, Bangladesh, Indonesia, Polynesia, New Guinea, and vast variety of species could also be found in Australia.. Common names for this genus are waxplant, waxvine, waxflower or simply hoyas.

Hoya - Wikipedia

Philippines - Philippines - Plant and animal life: Although many of the mountain regions and some of the lowlands remain heavily forested, the country's forests have been shrinking rapidly for decades. Between the mid-20th century and the early 21st century, the country's forestland was reduced by more than half—largely a result of logging, mining, and farming activities—and now ...
