systems. Learning Outcomes By the end of this unit students will be able to: 1. Identify pre-design information required for a non-domestic ventilation and air conditioning system. 2. Analyse cooling load for non-domestic buildings. 3.

Unit 10: Principles of Ventilation and Air Conditioning ...

There are two main

Acces PDF

Principles Heating Ventilation

components of a heating, ventilation, and air conditioning system. These two parts are the air handler, heating and cooling system, and the heat exchanger. In most cases, the heat source is some type of furnace. In an air conditioning system, the cooling system is composed of a number of unique subcomponents.
