Nothing from this scow sailing speed guide will click if you don't practice. I recommend you take your boat out in a wind speed that you can comfortably sit on the side of the boat without being overpowered. You need to increase your awareness of what the boat is telling you in two primary areas: heel and tiller pressure. These need to become instinctual for you.

J = Distance between the headstay termination at the deck and the front of the mast at the sheer line. P = Distance between black bands on the mast, or the maximum luff length of the main. E = Distance between black bands on the boom, or the maximum foot length of the main. PY & EY are similar to P & E, but indicate mizzen dimensions.

Sailboat Rig Dimensions - Vela Sailing Supply

The C Scow was the first class of scow built by Harry C. Melges, Sr. in 1945; it quickly became an all-time speed favorite. The C Scow has come a long way from the days of wooden materials and cotton sails. It continues to be a very revolutionary sailboat, inspired by more than 100 years of competitive racing.
